Changelog

Project: STUDYPLAN
Group number: 44
Period: 16 - 26 June

Please describe all changes in your project from 16 to 26 June in this changelog document. Export as PDF and add it to a 'documents' folder in your git project.

Keep it short and concise, but be specific about what changed. Feel free to resize the feedback text areas.

DESIGN

Project Description (project manual 4.1)
Unchanged

HTML/CSS Mockup (project manual 4.2)
Unchanged

Use Case Diagrams (project manual 4.3)
Unchanged

Database Design: Class Diagram and schema.sql (project manual 4.3 and 4.4)
-"Teacher" and "student" tables have been deleted *-"User_type" table created, connected to "user", in order to differentiate between teacher and student* *-Added more attributes in the tables "form" and "courses"* *-"Course_type" table created, identifies the different types of courses.*

FUNCTIONAL REQUIREMENTS

Added or revised functionality
-The mentor now can see each form according to its status (revision, approved, rejected)

-Also, the mentor can have a previous view of the form and its attributes where the mentor can check and approve or reject it.
-We have added a button with some default comments, thus the mentor can just change names or values.
-added some functions where the mentor can publish his comments and decision about the study plan, but it needs to be tested.

HTML/CSS/JS Frontend

Mentor page:
- *Better styling of the different buttons located on the page.*
- *Added a table structure for the displayed forms.*
- *Different JavaScript functions added:*
  - *Displaying the template comments*
  - *Publishing the comment after accepting or rejecting the form*
  - *Displaying the form when clicking one of the student-submitted forms in the displayed bar*

-Student page:
- *Improvement of the student page, making a dashboard. This dashboard contains a board where the student can see his forms, also we make the view of the form for each program.*
- *Connection with the database in order to obtain the courses and credits according to the program.*
- *Functions created in order to make the changes between pages within the dashboard.*

-Login page:
- *Minor corrections of the login page.*

Transactions (project manual 5.9)

Not yet implemented

JDBC / Prepared Statements (project manual 5.7)

+connections were made with some functions in order to get the required data
-Added information to the database, such as students (users) or completed forms
-Addition of the prepared statements (see security part)

XML/JSON (project manual 5.5)
Changed some paths within the mentor and student resources in order to make them more functional.

Usage of JSP/REST (project manual 5.5)
The use of REST services haven change too much more than some functionalities within the created methods

Testing (project manual 5.2 and 6.2)
unchanged

Security (project manual 6.3)
Addition of prepared statements, the passwords are hashed bcrypt and saved in the database.

OTHER

Other changes
